Monroe Gas-Magnum TDT go the distance for charity

For charity rally car driver Wayne Ames - when it comes to choosing shock absorbers it's all about finding a product that will go the distance – after all, every completed race means valuable funds for those in need.

So it's understandable that when it came to fitting his 1976 ZH Fairlane with new shocks he couldn't go past the Monroe Gas-Magnum TDTs.

The gas charged shocks promise superior performance and Wayne admits they're second to none when it comes to enduring the "ordinary" tracks of the Great Endeavour Rallies.

"The rally starts in Longreach and heads to Baradine via Kalgoorlie," Wayne said.

"The TDTs are remarkable and can certainly handle the terrain and the tougher conditions – we've been really impressed by their durability."

Gas-Magnum TDT features:

- Nitrogen Gas Charged
- 1-3/8" (35mm) bore
- Multi stage, high displacement valving
- Superior chrome rod
- Multi lip seal
- Non ride height dependent
- Three year/60,000 km

"Over four years of participating in the event, which raises funds for the Endeavour Foundation, we've been able to contribute \$40,000 and we definitely attribute our success to the long life of the cars components – in particular the shocks."

A licensed mechanic, Wayne has heavily modified the vehicle to cope with the punishment it receives in the rallies, but says the Gas-Magnum TDTs provide superior control on every surface.

"The vehicle doesn't lose traction and grabs onto the road in treacherous weather conditions," Wayne said.

"The shocks definitely ensure a firmer, but comfortable ride and the body roll has been significantly reduced – I'm thrilled to have found a product that performs so well.

MEDIA INFORMATION

"It only means that we can continue to take part in the rallies to support charity."

Monroe Gas-Magnum TDT is a super duty gas charged shock absorber that gives you superior performance from your 4x4 both on-road and off. Australian made for Australian conditions, Monroe's exclusive Twin Disc Technology (TDT) has delivered a tough, durable shock absorber that can keep you comfortable and safe on virtually any type of surface.
